

Avicenna International Community College LTD has started working for obtaining the status of an educational institution

Since May 2018, Avicenna International Community College Ltd has started preparations for obtaining the status of an educational institution, for which the regulatory acts required for the successful implementation of the learning environment and process of the authorization standard were prepared. The institution was staffed by qualified personnel aimed at creating a suitable environment for professional students. Also, based on researches, it was found out what vocational educational programs are in demand on the market. The survey showed, that among the programs was a kindergarten teacher and accountant.

The newly created group managed to create all the necessary documents in a short time to seek the practice objects, equipped with appropriate inventory and techniques for successful implementation of teaching, regulate the material-technical base and to plan its activities in a short period of time such a way to reach success.
